

Commissioning engineer [all gender] <<< Full time

Carbotech Gas Systems GmbH was founded from Bergbau-Forschung GmbH. That is why we can look back on more than 60 years of experience in developing, engineering, and manufacturing gas processing and gas generation plants. Carbotech Gas Systems GmbH is the specialist for industrial gas purification and gas production of various biogenic and technical gases.

With innovative technologies, we make an active contribution to CO2 neutral energy generation. The pressure swing absorption process (PSA) developed and patented by Carbotech is simple and convinces by its low energy consumption. Due to the continuous further development of the plants over the past three decades, the DWA is now one of the most efficient treatment processes on the market. Carbotech plants have been in operation worldwide for many years.

Tasks >>>

- Carrying out maintenance, servicing and repair work on technically complex equipment
- Replacement of individual parts on machines and installation of technical systems at the customer's site
- Commissioning of new plants with instruction and training of the customer's operating personnel
- Support of project management in the implementation of customer projects
- Technical customer support and consulting
- Maintenance of systems and troubleshooting both on-call and on-site at the customer's premises
- Support of the installation and commissioning processes

Qualification and competences >>>

- Completed technical vocational training e.g. electrician [all gender], electronics technician [all gender], mechatronics technician [all gender], preferably supplemented by master craftsman/technician training
- Professional experience in mechanical engineering and technical customer service desirable
- Knowledge in the field of electrical engineering is advantageous, e.g. reading of circuit diagrams and PLC controls
- Willingness to travel worldwide
- Car driving licence
- Good English skills
- Knowledge of MS-office
- Pleasure in dealing with people and customer orientation
- Solution-oriented and self-reliant work organization
- High level of commitment and ability to work under pressure
